SPONSOR AN INSTITUTIONALOS DIAGNOSTIC COHORT

See which gap will undermine your grantees' impact, before it does.

A bounded, evidence-based way to find and strengthen the institutional condition most likely to stall each grantee's next funding, growth, or leadership decision, with portfolio-level insight for you and confidential results for them.

Why now

36%

of nonprofits ended 2024 with an operating deficit, the highest in ten years of NFF's survey.

52%

hold three months of cash or less.

57%

of nonprofit CEOs say foundation grants have become harder to secure since January 2025.

Sources: Nonprofit Finance Fund, 2025 State of the Nonprofit Sector Survey (2,206 nonprofits); Center for Effective Philanthropy, State of Nonprofits 2026.

Each grantee receives

- A confidential Diagnostic: verified scores on seven dimensions, with the evidence behind each
- A written memo naming its binding constraint and the next in line
- A 90-day plan with owners and dates, including the steps to its next Candid Seal of Transparency level
- A live readout with its executive director and board chair
- A private client portal and a reassessment at six months

Your foundation receives

- An anonymized portfolio report: the most common constraints, where the cohort is strongest, and how it compares by stage
- A shared learning session for grantees and program staff
- Six-month reassessment results across the cohort
- No individual grantee's results without that grantee's permission

Why confidential matters. Grantees answer honestly when the results are theirs. You get the patterns you need to target capacity dollars, without turning a diagnostic into a review.

How a cohort runs

1. **Select 5 to 10 grantees** together, ideally at a decision point: expansion, a larger grant, a leadership change, or visible strain.
2. **Kickoff session** for the cohort: what the Diagnostic measures and how results stay confidential.
3. **Individual Diagnostics**, about four weeks each, run in parallel: intake, evidence review, readout, memo, and 90-day plan.
4. **Portfolio report and learning session** once every grantee has had its readout.
5. **Six-month reassessment** on the same rubric, so you see what moved.

The method

InstitutionalOS scores seven dimensions on one evidence rubric (not in place, talked about, informal, documented, verified): Strategy and Positioning; Program and Impact Evidence; Revenue and Financial Health; Leadership and Organizational Capacity; Operations and Infrastructure; Partnerships and Ecosystem; Governance and Risk. Higher scores require evidence a funder or board could check. Stage gates mean a strong average can't hide a critical weak spot. The full method is public at franklyinspired.associates/methodology.

Price

A cohort of five: five Diagnostics plus the portfolio report and learning session, from **$15,000**. Larger cohorts are quoted. A single sponsored Diagnostic is $2,000 to $2,500 by stage.

What it is not

It isn't an audit, an evaluation of program impact, or grant writing. Where a grantee's risk is technical (financial controls, legal, formal evaluation), we flag it and refer to a specialist.

Who leads it

Franklin D. Parham, Founder and Principal. He led The Hidden Genius Project's Mid-Atlantic region across Baltimore and Philadelphia, with full financial stewardship of $1.3M in regional budgets and 20+ cross-sector partnerships. Earlier, he set fundraising budgets and projections at the Society of American Foresters, managed a 700-prospect leadership and planned gift portfolio at Brandeis, and led donor relations at George Washington University.
